

Hit By the Counterstrike

By Bob

*Are you hooked on PC & Video Games?
Enjoy running around in huge multiplayer games?*

Then why not take part in a club dedicated to just that? As the title suggests, a large group of people play a huge networked game of *Counterstrike* - a first-person team-based shooter between terrorists and anti-terrorist forces - and *you* choose which side you're on. The environments are huge and detailed, and you even get to spray your own graffiti on the walls! Co-ordinate yourself with your team mates to achieve your tactical goals and objectives, and you would generally spend your time pumping bullets into the bodies of your enemies (while hoping they don't do that to you first)! All are welcome, and no previous experience is needed at all - just turn up to B205 any Wednesday at 2:00-3:30 to join in!
